

POSAI Kitchen Display System

Changelog

13 April 2026

Summary

166 commits across 9 feature areas. Major milestones: Portrait layout support, Seen/Unseen navigation overhaul, Settings reorganization, New Item indicators, and Sidebar restyling with glass-morphism.

New Item Indicators

- Added visual indicators for newly added products on existing tickets
- Implemented 2px solid green left border on new items
- Added background opacity pulse (blink) animation for new items
- Aligned new-item border styling to match aging indicator patterns
- Moved indicator border flush to card edge for consistency

Ticket Identifier Settings

- Renamed setting to 'Ticket Identifier' with clearer labels
- Updated options: 'Order Number' (default) and 'Guest Name/Number'
- Added random guest numbers for non-named orders in mock data
- Refined header label text across settings panel

Served Course Handling

- Made served course sections expandable/collapsible on ticket cards

Settings Reorganization

- Renamed Language card title for clarity
- Removed Region tab from Language settings (language-only focus)
- Rehomed Servable Modifiers into reorganized Settings menus
- Consolidated Printer Routing UI into streamlined layout
- Updated Connection description text
- Added Account section: debug mode, support diagnostic cards
- Added simulated Upload Logs with toast feedback

- Removed close (X) buttons from settings sub-screen headers (Language, Aging Rules, Order Type Colors)
- Removed Region UI from Language settings

Feedback and Support

- Built Feedback and Support modals system
- Removed 'Report a Bug' option (simplified to Feature Request only)
- Converted Feedback and Support section to grid layout
- Updated Feature Request modal UI with 150-character text limit

Sound Settings

- Built new alert sound configuration UI with preset options
- Wired play preview buttons for all sound presets
- Added sound preview for 'Other Alerts' category

Portrait Layout

- Built complete portrait orientation support from scaffolding to polished UI
- Added SummaryDrawer component for portrait mode
- Implemented two-column ticket grid with responsive card sizing
- Created icon-only footer controls (36px) optimized for portrait
- Polished footer labels and icon alignment across orientations
- Fixed portrait-specific icon sizing and positioning issues

Seen/Unseen Navigation

- Renamed 'New Orders' sidebar label to 'Seen'
- Removed 'In Progress' from left navigation
- Added 'Unseen' screen as separate filtered view
- Built Seen/Unseen screens with full order list rendering
- Wired Seen/Unseen state sync across Home and filtered screens

Sidebar Restyling

- Restyled KDSSidebar with glass-morphism effect (#7575754D background)
- Added restaurant logo asset to sidebar header
- Adjusted left navigation spacing and icon alignment
- Aligned badge counts to sidebar icon positions
